|---|-----------------|
| • I authorize Doctor _____ to perform IPL™ treatments on me in an effort to improve symptoms of Acne. | _____ |
| • I understand that without eye protection, IPL applied near the eyes may cause severe ocular complications | _____ |
| • I understand that there is a rare possibility of side effects or serious complications including permanent discoloration and scarring. I am aware that careful adherence to all advised instructions will help reduce this possibility | _____ |
| • I understand the below list of short-term effects and agree to follow matching guidelines: <ul style="list-style-type: none"> ▪ Flaking of pigmented lesions – crusts may take 5 to 10 days to disappear and it is important not to manipulate or pick which may otherwise lead to scarring ▪ Discomfort – during the procedure, I might experience a sensation similar to a rubber band snap which degree will vary per my skin condition and area sensitivity but that does not last long. A mild “sun-burn” sensation may follow for typically up to one hour and will be reduced with application of cooling and soothing creams ▪ Reddening and swelling – severity and duration depend on the intensity of the treatment and the sensitivity of the area to be treated. These phenomena may be reduced with application of cooling and/or anti-inflammatory creams ▪ Bruising may rarely occur and may last up to 2 weeks | _____ |
| • I understand that sun exposure or tanning of any sort is not aligned with the pre and/or post-care instructions and may increase the chance for complications | _____ |
| • The procedure as well as potential benefits and risks have been thoroughly explained to me and I have had all my related questions answered | _____ |
| • Pre and post-care instructions have been discussed and are completely clear to me | |
| • I understand that results may vary with each individual and acknowledge that it is impossible to predict how I will respond to the treatment and how many sessions will be required | _____ |
| • I consent to photographs being taken for the purpose of documenting my progress and response to the treatment and be kept solely in my medical record | _____ |
| • I consent to photographs being used for medical education or publication with applied discretion and not revealing my identity | _____ |
| • I agree to review the following IPL™ pre-treatment compliance checklist along with my Physician and bring accurate and updated data, to the best of my knowledge | _____ |

For all other conditions (relevant for an upgraded configuration of the OptiLight device):

	Skin type of the area to be treated: I <input type="checkbox"/> II <input type="checkbox"/> III <input type="checkbox"/> IV <input type="checkbox"/> V <input type="checkbox"/> VI <input type="checkbox"/>		
	Natural or artificial sun exposure in the past 3-4 weeks pre-op or the following 3-4 weeks post-op plan	NO	YES
	Use of self-tanners or tan enhancer caps within the past 3-4 weeks pre-op plan	NO	YES
	Photosensitive herbal preparations (St John's Wort, Ginkgo Biloba, etc...) or aromatherapy (essential oils)	NO	YES:
	Diseases which may be stimulated by light at 400 nm to 1200 nm, such as history of Systemic Lupus Erythematosus or Porphyria	NO	YES:
	Pregnant or possibility of pregnancy, postpartum or nursing	NO	YES
	Inflammatory skin conditions (dermatitis, etc...)	NO	YES:
	Presence or history of active cold sores or herpes simplex virus	NO	YES
HR	HIV	NO	YES
PL	Active cancer (currently on chemotherapy or radiation)	NO	YES
SR	Previous skin cancer?	NO	YES
VL	Medical history of keloids	NO	YES
	Intake of isotretinoin within the past year	NO	YES
	Medical history of Koebnerizing isomorphic diseases (vitiligo, psoriasis)	NO	YES:
	Any known allergy?	NO	YES:
	Any tattoo and/or pigmented lesion on requested treatment area that should be protected?	NO	YES
	List of additional current medication taken		
HR	Hormonal or endocrine disorders (PCOS or uncontrolled diabetes?)	NO	YES:
	Previous hair removal procedures on requested treatment area (other IPL/laser, wax, electrolysis, etc...)	NO	YES: what/when?
PL	Any observed modification (colour, size, texture and border) on the lesion to be treated?	NO	YES:
SR	Any hair on requested treatment area that should not be removed?	NO	YES
VL	Age of lesion onset?		
PL	Previous skin procedures on requested treatment area (Botox, fillers, peels, etc...)	NO	YES: what/when?
SR	Intake of aspirin or anti-coagulants?	NO	YES:
VL	Easy bruising?	NO	YES

IPL PRE-TREATMENT PATIENT INSTRUCTIONS

The primary reason for your treatment is the improvement of Dry Eye signs and symptoms. You must know that IPL is also used for and has been shown to reduce the appearance of red and brown spots on the skin from rosacea and unwanted age spots for example. The only intention of your treatment is the improvement of the signs and symptoms of dry eye disease, ocular surface disease, and Meibomian gland dysfunction.

Pretreatment Patient Education

Patients should be aware of the following prior to performing the IPL procedure:

- Results are not guaranteed
- Not all red and brown areas will disappear
- Red and brown spots removed by treatment may recur, especially with excessive sun exposure.
- Deep wrinkle lines will not be removed by the treatment.
- Adverse effects may include redness, swelling, burning, pain, crust formation, bruising, hyper-and hypo pigmentation, and scar information.
- Multiple treatment sessions (minimum of 4 consecutive separated by 2 to 3 weeks) are required for optimal results.
- Maintenance dry eye treatment will be reviewed with each patient individually.

Pretreatment Patient instructions

- Do not take isotretinoin (Accutane) for 1 month before treatment.
- If you are tanned or have been tanning, please reschedule your appointment with the advice and direction of your doctor
- Do not apply makeup or lotions on your face the day of treatment, or be prepared to remove them to completion at our office
- If you have a history of cold sores, take your prescribed medications (Valtrex, Famvir, Zovirax) on the day before, day of and the day after treatment. **Let our doctors know prior to arrival.**
- Inform our staff before each appointment if you (1) are taking new medications or (2) have tattoos or beauty marks you do not want to be altered.
- Inform the staff immediately if the area being treated feels "too hot"

IPL POST TREATMENT INSTRUCTIONS

Immediately after treatment patients may notice slight redness on their eyes, eyelids, and face. This may last anywhere from several hours to three days. Patients will be given individualized eye and eyelid regimens to improve outcomes and minimize any unintended discomfort. Dryness and grittiness may be worse with in the first 1-3 treatments and especially within the first couple of days of treatment due to evacuation of diseased oil.

Pigmented areas on the skin may also appear darker. Superficial pigment may darken, dry and slough off within seven to ten days. Deeper pigment darkens, and then slowly fades as the body absorbs the remnants of damaged pigment. In addition to discussing expected post treatment sequelae, patients are given the following instructions:

- Apply sunscreen everyday (30 SPF or greater)
- If the treated area is red and irritated after treatment you may apply an ice pack or cold compresses
- In caring for the treated area, use only gentle cleansers and lotions until healing is complete. Avoid perfumes and products with alcohol or acid.
- If a blister develops, notify the office immediately for directions on how to safely manage this. Do not pick the blister or scab because a scar may form.
- Call our office if any additional problems, questions, or concerns arise.

We look forward to your feedback and follow up on this revolutionary dry eye treatment!

Skin typing assessment quiz

One of the most important factors in deciding which Laser/IPL™ (and settings) to use is the patient skin type. Skin typing is determined by genetics, reaction of the skin to sun exposure and tanning habits. The following skin type quiz¹ is intended **as a sample only** to provide additional help in the evaluation of an individual skin type. *Skin typing of the area to be treated* is to be assessed. Lumenis takes no liability on that document and its content is not intended to be a substitute for professional medical diagnosis.

Genetic predisposition						Report Score ↓
Score →	0	1	2	3	4	
What is the color of your eyes?	Light blue, grey, green	Blue, grey or green	Blue	Dark brown	Brownish black
What is the natural color of your hair?	Sandy red	Blond	Chestnut, dark blond	Dark brown	Black
What is the color of your skin (non-exposed areas)?	Reddish	Very pale	Pale with beige tint	Light brown	Dark brown
Do you have freckles on non-exposed areas?	Many	Several	Few	Incidental	None

Total score for genetic predisposition:

Reaction to sun exposure						Report Score ↓
Score →	0	1	2	3	4	
What happens when you stay in the sun too long?	Painful redness, blistering, peeling	Blistering followed by peeling	Burns sometimes followed by peeling	Rare burns	Never had burns
To what degree do you turn brown?	Hardly or not at all	Light colour tan	Reasonable tan	Tan very easy	Turn dark brown quickly
Do you turn brown within several hours after sun exposure?	Never	Seldom	Sometimes	Often	Always
How does your face react to the sun?	Very sensitive	Sensitive	Normal	Very resistant	Never had a problem

Total score for reaction to sun exposure:

Tanning habits						Report Score ↓
Score →	0	1	2	3	4	
When did you last expose your body to sun (or artificial sunlamp/self-tanning cream)?	More than 3 months ago	2-3 months ago	1-2 months ago	Less than a month ago	Less than 2 weeks ago
Did you expose the area to be treated to the sun?	Never	Hardly ever	Sometimes	Often	Always

Total score for tanning habits:

Add up the total scores for each of the three sections for your Skin Type Score:

¹ Quiz adapted from the Radiation protection (tanning units) amendment regulation by the Australian Government Health Directorate and the American Skin Cancer Foundation
